ANATOMY OF AN HTML ELEMENT

👉 **Element**

```
<p>HTML is a markup language</p>
```

👉 **Opening tag:** Name of the element, wrapped in < and >

👉 **Content:** Content of the element, in this example text. But it might be another element (**child element**). Some elements have **no content** (e.g. `<img>`)

👉 **Closing tag:** Same as opening tag, but with a `/`. When element has no content, it's omitted

HOW WE **SELECT** AND **STYLE** ELEMENTS

A CSS RULE

THE **RGB** MODEL

- **RGB Model:** Every color can be represented by a combination of **RED**, **GREEN** and **BLUE**
- Each of the 3 base colors can take a value between **0** and **255**, which leads to 16.8 million different colors

DEFINING COLORS IN CSS

1 RGB / RGBA NOTATION

👉 Regular RGB model

```
rgb(0, 255, 255)
```

👉 RGB with **transparency** (“alpha”)

```
rgba(0, 255, 255, 0.3)
```

```
#f4b33f
```

```
rgb(244, 179, 63)
```

```
rgba(244, 179, 63, 0.7)
```

2 HEXADECIMAL NOTATION

👉 Instead of using a scale from 0 to 255, we go from **0 to ff** (255 in hexadecimal numbers)

```
#00ffff
```

👉 Shorthand, when all colors are identical pairs

```
#0ff
```

💡 In practice, we mostly use **hexadecimal** colors, and `rgba` when we need transparency

👉 Color picker in VS Code

SHADES OF **GREY**

- When colors in all 3 channels are the same, we get a **grey color**
- There are 256 pure grays to choose from

`rgb(0, 0, 0) / #000000 / #000`

`rgb(69, 69, 69) / #444444 / #444`

`rgb(183, 183, 183) / #b7b7b7`

`rgb(255, 255, 255) / #ffffff / #fff`

CONFLICTING SELECTORS AND DECLARATIONS

```html
<p id="author-text" class="author">
  Posted by Laura Jones on Monday, June 21st 2027
</p>
```

```css
.author {
  font-style: italic;
  font-size: 18px;
}

#author-text {
  font-size: 20px;
}

p,
li {
  font-family: sans-serif;
  color: #444444;
  font-size: 22px;
}
```

🤔 There are **multiple selectors** selecting the same element. **Which one of them applies?**

🤓 ***All of them. All rules and properties are applied!***

🤔 But there are **conflicting** `font-size` declarations! Is it `18px`, or `20px`, or `22px`?

🤓 *Let's see how it works…*

RESOLVING CONFLICTING DECLARATIONS

Highest priority

5. Declarations marked `!important`

   ↓ No `important!` ?

4. Inline style (`style` attribute in HTML)

   ↓ No inline style?

3. ID (`#`) selector → Multiple? → 👉 **Last selector** in code applies *

   ↓ No `#` selector?

2. Class (`.`) or pseudo-class (`:`) selector → Multiple? → 👉 **Last selector** in code applies *

   ↓ No `.` or `:` selector?

1. Element selector (`p`, `div`, `li`, etc.) → Multiple? → 👉 **Last selector** in code applies *

   ↓ No element selector?

0. Universal selector (`*`)

Lowest priority

```
.author {
  font-style: italic;
  font-size: 18px;
}

#author-text {
  font-size: 20px;
}

p,
li {
  font-family: sans-serif;
  color: #444444;
  font-size: 22px;
}
```

👉 There is an ID selector (`#author-text`), so **for the conflicting `font-size` property**, this is the selector that applies

☝ * It's a bit more complicated in reality

HOW **INHERITANCE** WORKS

Parent element

```html
<body>

  <nav>
    This is the navigation
  </nav>

  <h1>My website</h1>

  <p>
    The text is this paragraph
    is completely irrelevant 😄
  </p>

</body>
```

```
color: #444444;
font-size: 16px;
font-family: sans-serif;
```

```
~~color: #444444;~~
~~font-size: 16px;~~
font-family: sans-serif;
```

```
color: #444444;
font-size: 16px;
font-family: sans-serif;
```

```
body {
  color: #444444;
  font-size: 16px;
  font-family: sans-serif;

  border-top: 10px solid #1098ad;
}
```

The `border` property does **NOT** get inherited

```
h1 {
  color: #1098ad;
  font-size: 32px;
  text-transform: uppercase;
}
```

OVERRIDING INHERITED STYLES

☝️ Not all properties get inherited. It's mostly ones **related to text**: `font-family`, `font-size`, `font-weight`, `font-style`, `color`, `line-height`, `letter-spacing`, `text-align`, `text-transform`, `text-shadow`, `list-style`, etc.

THE **CSS BOX MODEL**

- 👉 **Content**: Text, images, etc.
- 👉 **Border**: A line around the element, still **inside** of the element
- 👉 **Padding**: Invisible space around the content, **inside** of the element
- 👉 **Margin**: Space **outside** of the element, between elements
- 👉 **Fill area**: Area that gets filled with **background color** or **background image**

ELEMENT **HEIGHT** AND **WIDTH** CALCULATION

Final element width = left border + left padding + width + right padding + right border

Final element height = top border + top padding + height + bottom padding + bottom border

- 👉 We can specify all these values using CSS properties
- 👉 This is the **default behavior**, but we can change it

BLOCK-LEVEL ELEMENTS

- 👉 Elements are formatted visually as **blocks**
- 👉 Elements occupy **100% of parent element's width**, no matter the content
- 👉 Elements are **stacked vertically** by default, one after another
- 👉 The box-model **applies as showed** earlier

Default elements: `body, main, header, footer, section, nav, aside, div, h1-h6, p, ul, ol, li,` etc.

With CSS: `display: block`

The Basic Language of the Web: HTML

*Posted by **Laura Jones** on Monday, June 21st 2027*

All modern websites and web applications are built using three *fundamental* technologies: HTML, CSS and JavaScript. These are the languages of the web.

In this post, let's focus on HTML. We will learn what HTML is all about, and why should learn it.

What is HTML?

Lorem ipsum dolor sit amet consectetur adipisicing elit. Quam recusandae reprehenderit vitae ratione veritatis corrupti sit ut vero, dolores nulla exercitationem eos quod iusto incidunt, perferendis alias tenetur. Est, vel!

In HTML, each element is made up of 3 parts:

1. **The opening tag**
2. The closing tag
3. *The actual element*

You can learn more at the MDN Web Docs.

INLINE ELEMENTS

- Occupies only the space **necessary for its content**
- Causes **no line-breaks** after or before the element
- Box model applies in a different way: **heights and widths do not apply**
- **Paddings and margins** are applied **only horizontally** (left and right)

Default elements: `a`, `img`, `strong`, `em`, `button`, etc.

With CSS: `display: inline`

The Basic Language of the Web: HTML

Posted by ***Laura Jones*** *on Monday, June 21st 2027*

All modern websites and web applications are built using three *fundamental* technologies: HTML, CSS and JavaScript. These are the languages of the web.

In this post, let's focus on HTML. We will learn what HTML is all about, and why should learn it.

What is HTML?

Lorem ipsum dolor sit amet consectetur adipisicing elit. Quam recusandae reprehenderit vitae ratione veritatis corrupti sit ut vero, dolores nulla exercitationem eos quod iusto incidunt, perferendis alias tenetur. Est, vel!

In HTML, each element is made up of 3 parts:

1. **The opening tag**
2. The closing tag
3. *The actual element*

You can learn more at the MDN Web Docs.

SUMMARY: INLINE, BLOCK-LEVEL AND INLINE-BLOCK BOXES

BLOCK-LEVEL BOXES

- Elements formatted visually as blocks
- 100% of parent's width
- Vertically, one after another
- Box-model applies as showed

INLINE-BLOCK BOXES

- Looks like inline from the **outside**, behaves like block-level on the **inside**
- Occupies only content's space
- Causes no line-breaks
- Box-model applies as showed

```
display: inline-block
```

INLINE BOXES

- Occupies only content's space
- Causes no line-breaks
- Box model is different: heights and widths do not apply
- Paddings and margins only horizontal (left and right)

NORMAL FLOW **VS.** ABSOLUTE POSITIONING

NORMAL FLOW

- 👉 Default positioning
- 👉 Element is "**in** flow"
- 👉 Elements are simply laid out according to their order in the HTML code

Default positioning

```
position: relative
```

ABSOLUTE POSITIONING

- 👉 Element is removed from the normal flow: "**out of** flow"
- 👉 No impact on surrounding elements, might overlap them
- 👉 We use `top`, `bottom`, `left`, or `right` to offset the element from its **relatively positioned container**

```
position: absolute
```

UNDERSTANDING **ABSOLUTE** POSITIONING

```
.el {
  position: absolute;
  top: 100px;
  left: 200px;
  background-color: #f4b33f;
}
```

```
.container {
  position: relative;
  background-color: #f7e6c1;
}
```

WHAT DOES “**LAYOUT**” MEAN?

LAYOUT

- 👉 Layout is the way text, images and other content is placed and arranged on a webpage
- 👉 Layout gives the page a visual structure, into which we place our content
- 👉 **Building a layout:** arranging page elements into a visual structure, instead of simply having them placed one after another (normal flow)

PAGE LAYOUT **VS.** COMPONENT LAYOUT

PAGE LAYOUT

COMPONENT LAYOUT

THE **3 WAYS** OF BUILDING LAYOUTS WITH CSS

1

FLOAT LAYOUTS

The **old way of building layouts** of all sizes, using the `float` CSS property. Still used, but getting outdated fast.

2

FLEXBOX

Modern way of laying out elements in a **1-dimensional row** without using floats. Perfect for **component layouts**.

3

CSS GRID

For laying out element in a fully-fledged **2-dimensional grid**. Perfect for **page layouts and complex components**.

ABSOLUTE POSITIONING **VS.** FLOATS

NORMAL FLOW

- 👉 Default positioning
- 👉 Element is “**in** flow”
- 👉 Elements are simply laid out according to their order in the HTML code

Default positioning

```
position: relative
```

ABSOLUTE POSITIONING

- 👉 Element is removed from the normal flow: “**out of** flow”
- 👉 No impact on surrounding elements, might overlap them
- 👉 We use `top`, `bottom`, `left`, or `right` to offset the element from its **relatively positioned container**

```
position: absolute
```

FLOATS

- 👉 Element is removed from the normal flow: “**out of** flow”
- 👉 Text and inline elements will wrap around the floated element
- 👉 The container will **not** adjust its height to the element

```
float: left
float: right
```

THE BOX MODEL WITH **BOX-SIZING: BORDER-BOX**

Final element width = ~~right border~~ + ~~right padding~~ + $\boxed{\text{width}}$ + ~~left padding~~ + ~~left border~~

Final element height = ~~top border~~ + ~~top padding~~ + $\boxed{\text{height}}$ + ~~bottom padding~~ + ~~bottom border~~

WHAT IS **FLEXBOX**?

FLEXBOX

- Flexbox is a set of related **CSS properties** for **building 1-dimensional layouts**
- The main idea behind flexbox is that empty space inside a container element can be **automatically divided** by its child elements
- Flexbox makes it easy to automatically **align items to one another** inside a parent container, both horizontally and vertically
- Flexbox solves common problems such as **vertical centering** and creating **equal-height columns**
- Flexbox is perfect for **replacing floats**, allowing us to write fewer and cleaner HTML and CSS code

FLEXBOX **TERMINOLOGY**

```
display: flex
```

FLEX CONTAINER

1. **`gap: 0 | <length>`**

   👉 *To create **space between items**, without using `margin`*

2. **`justify-content: flex-start | flex-end | center | space-between | space-around | space-evenly`**

   👉 *To align items along main axis (**horizontally**, by default)*

3. **`align-items: stretch | flex-start | flex-end | center | baseline`**

   👉 *To align items along cross axis (**vertically**, by default)*

4. **`flex-direction: row | row-reverse | column | column-reverse`**

   👉 *To define which is the **main axis***

5. **`flex-wrap: nowrap | wrap | wrap-reverse`**

   👉 *To allow items to **wrap into a new line** if they are too large*

6. **`align-content: stretch | flex-start | flex-end | center | space-between | space-around`**

   👉 *Only applies when there are **multiple lines** (`flex-wrap: wrap`)*

FLEX ITEMS

1. **`align-self: auto | stretch | flex-start | flex-end | center | baseline`**

   👉 *To **overwrite** `align-items` for individual flex items*

2. **`flex-grow: 0 | <integer>`**

   👉 *To allow an element **to grow** (0 means no, 1+ means yes)*

3. **`flex-shrink: 1 | <integer>`**

   👉 *To allow an element **to shrink** (0 means no, 1+ means yes)*

4. **`flex-basis: auto | <length>`**

   👉 *To define an item's width, **instead of the `width` property***

5. **`flex: 0 1 auto | <int> <int> <len>`**

   👉 ***Recommended** shorthand for `flex-grow`, `-shrink`, `-basis`.*

6. **`order: 0 | <integer>`**

   👉 *Controls order of items. -1 makes item **first**, 1 makes it **last***

SECTION

LAYOUTS: FLOATS, FLEXBOX, AND CSS GRID FUNDAMENTALS

LECTURE

A CSS GRID OVERVIEW

WHAT IS **CSS GRID**?

CSS GRID

- CSS Grid is a set of **CSS properties** for **building 2-dimensional layouts**
- The main idea behind CSS Grid is that we **divide a container element into rows and columns** that can be filled with its child elements
- In two-dimensional contexts, CSS Grid allows us to write **less nested HTML** and **easier-to-read CSS**
- CSS Grid is **not meant to replace flexbox**! Instead, they work perfectly together. Need a **1D** layout? Use flexbox. Need a **2D** layout? Use CSS Grid.

BASIC CSS GRID **TERMINOLOGY**

```
display: grid
```

MORE CSS GRID **TERMINOLOGY**

GRID CONTAINER

1

```
grid-template-rows: <track size>*
grid-template-columns: <track size>*
```

👉 *To establish the grid **row and column tracks**. One length unit for each track. Any unit can be used, new **fr** fills unused space*

2

```
row-gap: 0 | <length>
column-gap: 0 | <length>
```

```
gap: 0 | <length>
```

👉 *To **create empty space** between tracks*

3

```
justify-items: stretch | start | center | end
align-items: stretch | start | center | end
```

👉 *To align items inside rows / columns (**horizontally** / **vertically**)*

4

```
justify-content: start | start | center | end | ...
align-content: start | start | center | end | ...
```

👉 *To align entire **grid inside grid container**. Only applies if container is larger than the grid*

GRID ITEMS

1

```
grid-column: <start line> / <end line> | span <number>
grid-row: <start line> / <end line> | span <number>
```

👉 *To **place a grid item** into a specific cell, based on line numbers. `span` keyword can be used to span an item across more cells*

2

```
justify-self: stretch | start | center | end
align-self: stretch | start | center | end
```

👉 *To **overwrite** `justify-items` / `align-items` for single items*

☝️ *This list of CSS Grid properties is not exhaustive, but enough to get started.*

WHY TAKE DESIGN **SERIOUSLY**?

GOOD DESIGN

- ✅ Creates an immediate and lasting **good impression** of the brand or product;
- ✅ Makes the user **trust** the brand right away;
- ✅ Increases the user's **perceived value** of the brand or product;
- ✅ Gives users exactly **what they were looking for** when coming to the site, e.g. purchasing a product or finding information.

BAD DESIGN

- 🚫 Makes users believe the brand doesn't really care about their product or service;
- 🚫 Makes the user insecure about trusting the brand;
- 🚫 Makes the brand or product seem "cheap";
- 🚫 Leaves users confused, and makes it hard to for them to reach their goal.

ANYONE CAN LEARN GOOD DESIGN!

Good web design is **not subjective or creative** 👉 Everyone can learn basics by following a **framework/system**

100s of well-designed sites **deconstructed** → Distilled into easy-to-learn and easy-to-apply **rules** → Divided in 9 different areas of design: **ingredients** → Rules will be applied based on **website personality**

WEB DESIGN **INGREDIENTS** YOU WILL LEARN ABOUT

1. **Typography**
2. **Colors**
3. **Images/Illustrations**
4. **Icons**
5. **Shadows**

6. **Border-radius**
7. **Whitespace**
8. **Visual Hierarchy**
9. **User Experience**
10. **Components/Layout**

☝️ Design decisions for each ingredient are based on **website personality**

OVERVIEW OF **WEBSITE PERSONALITIES**

1 **Serious/Elegant:** For luxury and elegance, based on thin serif typefaces, golden or pastel colors, and big high-quality images

OVERVIEW OF **WEBSITE PERSONALITIES**

1. **Serious/Elegant:** For luxury and elegance, based on thin serif typefaces, golden or pastel colors, and big high-quality images

2. **Minimalist/Simple:** Focusses on the essential text content, using small or medium-sized sans-serif black text, lines, and few images and icons

OVERVIEW OF **WEBSITE PERSONALITIES**

1. **Serious/Elegant:** For luxury and elegance, based on thin serif typefaces, golden or pastel colors, and big high-quality images

2. **Minimalist/Simple:** Focusses on the essential text content, using small or medium-sized sans-serif black text, lines, and few images and icons

3. **Plain/Neutral:** Design that gets out of the way by using neutral and small typefaces, and a very structured layout. Common in big corporations

OVERVIEW OF **WEBSITE PERSONALITIES**

1. **Serious/Elegant:** For luxury and elegance, based on thin serif typefaces, golden or pastel colors, and big high-quality images

2. **Minimalist/Simple:** Focusses on the essential text content, using small or medium-sized sans-serif black text, lines, and few images and icons

3. **Plain/Neutral:** Design that gets out of the way by using neutral and small typefaces, and a very structured layout. Common in big corporations

4. **Bold/Confident:** Makes an impact, by featuring big and bold typography, paired with confident use of big and bright colored blocks

OVERVIEW OF **WEBSITE PERSONALITIES**

1. **Serious/Elegant:** For luxury and elegance, based on thin serif typefaces, golden or pastel colors, and big high-quality images

2. **Minimalist/Simple:** Focusses on the essential text content, using small or medium-sized sans-serif black text, lines, and few images and icons

3. **Plain/Neutral:** Design that gets out of the way by using neutral and small typefaces, and a very structured layout. Common in big corporations

4. **Bold/Confident:** Makes an impact, by featuring big and bold typography, paired with confident use of big and bright colored blocks

5. **Calm/Peaceful:** For products and services that care, transmitted by calming pastel colors, soft serif headings, and matching images/illustrations

OVERVIEW OF **WEBSITE PERSONALITIES**

1. **Serious/Elegant:** For luxury and elegance, based on thin serif typefaces, golden or pastel colors, and big high-quality images

2. **Minimalist/Simple:** Focusses on the essential text content, using small or medium-sized sans-serif black text, lines, and few images and icons

5. **Calm/Peaceful:** For products and services that care, transmitted by calming pastel colors, soft serif headings, and matching images/illustrations

6. **Startup/Upbeat:** Widely used in startups, featuring medium-sized sans-serif typefaces, light-grey text and backgrounds, and rounded elements

7. **Playful/Fun:** Colorful and round designs, fueled by creative elements like hand-drawn icons or illustrations, animations, and fun language

SOME **CONCEPTS** FIRST...

SERIF VS SANS-SERIF

Serif typeface

- Creates a traditional/ classic look and feel
- Conveys trustworthiness
- Good for long text

Text

Sans-serif typeface

- Modern look and feel
- Clean and simple
- **Easier to choose for beginner designer!**

USE GOOD **TYPEFACES**

1 Use only good and popular typefaces and play it safe

SANS SERIF

Inter	Almost before we knew it, we had left the ground.
Open Sans	Almost before we knew it, we had left the ground.
Roboto	Almost before we knew it, we had left the ground.
Montserrat	Almost before we knew it, we had left the ground.
Work Sans	Almost before we knew it, we had left the ground.
Lato	Almost before we knew it, we had left the ground.

TOOLBOX

Google Fonts

FONT SQUIRREL

All tools are listed on my **resources page** at jonas.io

USE GOOD **TYPEFACES**

1 Use only good and popular typefaces and play it safe

SERIF

Merriweather	Almost before we knew it, we had left the ground.
Aleo	Almost before we knew it, we had left the ground.
Playfair Display	Almost before we knew it, we had left the ground.
Cormorant	Almost before we knew it, we had left the ground.
Cardo	Almost before we knew it, we had left the ground.
Lora	Almost before we knew it, we had left the ground.

TOOLBOX

Google Fonts

FONT SQUIRREL

All tools are listed on my **resources page** at jonas.io

USE GOOD **TYPEFACES**

1. Use only good and popular typefaces and play it safe

2. It’s okay to use just one typeface per page! If you want more, limit to 2 typefaces.

3. Choose the **right typeface** according to your website personality:

- 👉 Choose the right personality for your website (*more on this later*)
- 👉 Decide between a serif and sans-serif typeface
- 👉 Experiment with all the “good” typefaces (and other typefaces from Google Fonts!) to see which ones best fits your website’s message (this will come with experience)
- 👉 You can keep trying different typefaces as you design and build the page

USE GOOD FONT **SIZES AND WEIGHTS**

4 When choosing font-sizes, **limit choices**! Use a **“type scale” tool** or other **pre-defined range**

USE GOOD FONT **SIZES AND WEIGHTS**

4. When choosing font-sizes, **limit choices**! Use a **“type scale” tool** or other **pre-defined range**

5. Use a font size between 16px and 32px for **“normal” text**

6. For **long text** (like a blog post), try a size of 20px or even bigger

7. For **headlines**, you can go really big (50px+) and bold (600+), **depending on personality**

8. For any text, don’t use a font weight under 400 (regular)

CREATE A GOOD **READING EXPERIENCE**

9 Use less than 75 characters per line

CREATE A GOOD **READING EXPERIENCE**

9 Use less than 75 characters per line

10 For normal-sized text, use a line height between 1.5 and 2. For big text, go below 1.5

☝️ The **smaller** or **longer** the text, the **larger** the line height needs to be!

😃

Glassmorphism in user interfaces 1.2

Another year, another UI trend is becoming increasingly popular among designers. Do you know it yet? 1.31

Michal Malewicz Nov 22, 2020 · 8 min read ★

Last year I unintentionally started the craze around Neumorphism, but as I predicted then, it didn't really take over the design scene. In that very first article, I also mentioned all the potential accessibility problems this style faces, which hopefully helped all the other articles raising accessibility issues that year :-) 1.52

😡

Last year I unintentionally started the craze around Neumorphism, but as I predicted then, it didn't really take over the design scene. In that very first article, I also mentioned all the potential accessibility problems this style faces, which hopefully helped all the other articles raising accessibility issues that year :-) 2.2

CREATE A GOOD **READING EXPERIENCE**

9 Use less than 75 characters per line

10 For normal-sized text, use a line height between 1.5 and 2. For big text, go below 1.5

☝️ The **smaller** or **longer** the text, the **larger** the line height needs to be!

11 Decrease letter spacing in headlines, if it looks unnatural (this will come from experience)

😃

😐

CREATE A GOOD **READING EXPERIENCE**

9 Use less than 75 characters per line

10 For normal-sized text, use a line height between 1.5 and 2. For big text, go below 1.5

☝ The **smaller** or **longer** the text, the **larger** the line height needs to be!

11 Decrease letter spacing in headlines, if it looks unnatural (this will come from experience)

12 Experiment with all caps for short titles. Make them small and bold and increase letter-spacing

CREATE A GOOD **READING EXPERIENCE**

9 Use less than 75 characters per line

10 For normal-sized text, use a line height between 1.5 and 2. For big text, go below 1.5

☝️ The **smaller** or **longer** the text, the **larger** the line height needs to be!

11 Decrease letter spacing in headlines, if it looks unnatural (this will come from experience)

12 Experiment with all caps for short titles. Make them small and bold and decrease letter-spacing

13 Usually, don’t justify text

😃

Glassmorphism in user interfaces

Another year, another UI trend is becoming increasingly popular among designers. Do you know it yet?

Last year I unintentionally started the craze around Neumorphism, but as I predicted then, it didn’t really take over the design scene. In that very first article, I also mentioned all the potential accessibility problems this style faces, which hopefully helped all the other articles raising accessibility issues that year :-)

Sure — there were some apps and products done in this style, but most notable, widespread uses were in some Samsung ads and in the MKBHD intro video. So not any full products, but rather smaller elements which proves my thesis that this style can work if used scarcely and if the objects on these backgrounds still hold their structure and readability without the decoration.

CREATE A GOOD **READING EXPERIENCE**

9. Use less than 75 characters per line

10. For normal-sized text, use a line height between 1.5 and 2. For big text, go below 1.5

    ☝️ The **smaller** or **longer** the text, the **larger** the line height needs to be!

11. Decrease letter spacing in headlines, if it looks unnatural (this will come from experience)

12. Experiment with all caps for short titles. Make them small and bold and decrease letter-spacing

13. Usually, don't justify text

14. Don't center long text blocks. Small blocks are fine

😃

WEB DESIGN RULES AND FRAMEWORK

LECTURE

WEB DESIGN RULES #2: COLORS

CHOOSE THE **RIGHT COLOR**

1 Make the main color **match your website's personality**: colors convey meaning!

- **Red** draws a lot of attention, and symbolizes power, passion, and excitement
- **Orange** is less aggressive, and conveys happiness, cheerfulness, and creativity
- **Yellow** means joy, brightness, and intelligence
- **Greens** represents harmony, nature, growth, and health
- **Blue** is associated with peace, trustworthiness, and professionalism
- **Purple** conveys wealth, wisdom, and magic
- **Pink** represents romance, care, and affection
- **Brown** is associated with nature, durability and comfort
- **Black** symbolizes power, elegance and minimalism, but also grief and sorrow

CHOOSE THE **RIGHT COLOR**

1. Make the main color **match your website's personality**: colors convey meaning!

2. Use a **good color tone**! Don't choose a random tone or CSS named colors.

🛠️ TOOLBOX

OC- Open color

CHOOSE THE **RIGHT COLOR**

1. Make the main color **match your website's personality**: colors convey meaning!
2. Use a **good color tone**! Don't choose a random tone or CSS named colors.

TOOLBOX

oc- Open color

tailwindcss

FLAT UI COLORS 2

ESTABLISH A COLOR **SYSTEM**

3. You need at least two types of colors in your **color palette**: a **main color** and a **grey color**

4. With more experience, you can add more colors: **accent (secondary) colors** (use a tool)

MAIN **ACCENT** **GREY**

COLOR PALETTE

ESTABLISH A COLOR **SYSTEM**

3. You need at least two types of colors in your **color palette**: a **main color** and a **grey color**
4. With more experience, you can add more colors: **accent colors** (use a tool)
5. For diversity, create lighter and darker “versions” (**tints and shades**)

- Tint & Shade Generator

WHEN AND HOW TO USE COLORS

6 Use your main color to **draw attention** to the most important elements on the page

WHEN AND HOW TO USE COLORS

6 Use your main color to **draw attention** to the most important elements on the page

WHEN AND HOW TO USE COLORS

6 Use your main color to **draw attention** to the most important elements on the page

WHEN AND HOW TO USE COLORS

6 Use your main color to **draw attention** to the most important elements on the page

7 Use colors to add **interesting accents** or make **entire components or sections** stand out

WHEN AND HOW TO USE COLORS

6 Use your main color to **draw attention** to the most important elements on the page

7 Use colors to add **interesting accents** or make **entire components or sections** stand out

WHEN AND HOW TO USE COLORS

6. Use your main color to **draw attention** to the most important elements on the page

7. Use colors to add **interesting accents** or make **entire components or sections** stand out

WHEN AND HOW TO USE COLORS

6. Use your main color to **draw attention** to the most important elements on the page
7. Use colors to add **interesting accents** or make **entire components or sections** stand out
8. You can try to use your color strategically in **images and illustrations**

COLORS AND **TYPOGRAPHY**

9 On dark colored backgrounds, try to **use a tint of the background** (“lighter version”) for text

COLORS AND **TYPOGRAPHY**

9 On dark colored backgrounds, try to **use a tint of the background** (“lighter version”) for text

10 Text should usually not be completely black. **Lighten if up** it looks heavy and uninviting

COLORS AND **TYPOGRAPHY**

9 On dark colored backgrounds, try to **use a tint of the background** (“lighter version”) for text

10 Text should usually not be completely black. **Lighten it up** it looks heavy and uninviting

♿ 11 **Don’t make text too light**! Use a tool to check contrast between text and background colors

☝️ Contrast ratio needs to be at least **4.5:1 for normal text** and **3:1 for large text** (18px+)

COOLORS

- unDraw

USE IMAGES **WELL**

4 Try to show **real people** to trigger user's emotions

USE IMAGES **WELL**

4. Try to show **real people** to trigger user's emotions

5. If necessary, **crop images** to fit your message

USE IMAGES **WELL**

4. Try to show **real people** to trigger user's emotions
5. If necessary, **crop images** to fit your message
6. Experiment **combining** photos, illustrations and patterns

HANDLING **TEXT** ON IMAGES

7 **Method #1:** Darker or brighten image (completely or partially, using a gradient)

HANDLING **TEXT** ON IMAGES

7 **Method #1:** Darker or brighten image (completely or partially, using a gradient)

8 **Method #2:** Position text into neutral image area

HANDLING **TEXT** ON IMAGES

7 **Method #1:** Darker or brighten image (completely or partially, using a gradient)

8 **Method #2:** Position text into neutral image area

9 **Method #3:** Put text in a box

SOME **TECHNICAL** DETAILS

10 To account for **high-res screens**, make image dimensions **2x as big** as their displayed size

- 👉 **Scale factor:** Actual pixels the screen contains / Pixels represented on screen
- 👉 On high-res screens, scale factor is **2x** or even **3x**, on “normal” screens it’s just **1x** (1 physical pixel = 1 design pixel)

Visible: 300 × 300 px

@2x

Original image: 600 × 600 px

SOME **TECHNICAL** DETAILS

10 To account for **high-res screens**, make image dimensions **2x as big** as their displayed size

- 👉 **Scale factor:** Actual pixels the screen contains / Pixels represented on screen
- 👉 On high-res screens, scale factor is **2x** or even **3x**, on “normal” screens it’s just **1x** (1 physical pixel = 1 design pixel)

Visible: 300 × 300 px

😡 Blurry image on **high-res screen**

@1x

😃 Looks okay on **low-res screen**

Original image: 300 × 300 px

SOME **TECHNICAL** DETAILS

10 To account for **high-res screens**, make image dimensions **2x as big** as their displayed size

11 **Compress images** for a lower file size and better performance

😡 😃

🛠️ **TOOLBOX**

- Unsplash
- Pexels
- DrawKit
- unDraw
- Squoosh

SOME **TECHNICAL** DETAILS

10. To account for **high-res screens**, make image dimensions **2x as big** as their displayed size
11. **Compress images** for a lower file size and better performance
12. When using multiple images side-by-side, make sure they have the **exact same dimensions**

WEB DESIGN RULES AND FRAMEWORK

LECTURE

WEB DESIGN RULES #4: ICONS

USE **GOOD ICONS**

1 Use a **good icon pack**, there are tons of **free** and paid icons packs

Phosphor icons

✌️ **You can just use emojis too**

🛠️ **TOOLBOX**

Phosphor icons

ionicons

ICONS8

and many, many more...

USE **GOOD ICONS**

1. Use a **good icon pack**, there are tons of **free** and paid icons packs
2. Use only one icon pack. **Don't mix** icons from different icon packs

This icon has a completely different style: **filled** and **boxy/squared**

USE **GOOD ICONS**

1. Use a **good icon pack**, there are tons of **free** and paid icons packs
2. Use only one icon pack. **Don't mix** icons from different icon packs
3. Use **SVG icons** or **icon fonts**. Don't use bitmap image formats (.jpg and .png)!

😡

BITMAP

- 👉 "Regular images": JPG, PNG, GIF
- 👉 Do **not** scale, become **unsharp**!

😃

VECTOR-BASED

- 👉 SVG images and icon fonts
- 👉 Scale **indefinitely**!

USE **GOOD ICONS**

1. Use a **good icon pack**, there are tons of **free** and paid icons packs
2. Use only one icon pack. **Don't mix** icons from different icon packs
3. Use **SVG icons** or **icon fonts**. Don't use bitmap image formats (.jpg and .png)!
4. Adjust to website personality! **Roundness**, **weight** and **filled/outlined** depend on typography

WHEN TO USE ICONS

5 Use icons to **provide visual assistance** to text

WHEN TO USE ICONS

5 Use icons to **provide visual assistance** to text

6 Use icons for **product feature blocks**

WHEN TO USE ICONS

5. Use icons to **provide visual assistance** to text
6. Use icons for **product feature blocks**
7. Use icons **associated with actions**, and **label them** (unless no space or icon is 100% clear)

Some elements are text, others are unlabeled icons…

WHEN TO USE ICONS

5. Use icons to **provide visual assistance** to text
6. Use icons for **product feature blocks**
7. Use icons **associated with actions**, and **label them** (unless no space or icon is 100% clear)
8. Use icons **as bullet points**

USE ICONS **WELL**

9 To keep icons neutral, **use same color as text**. To draw more attention, **use different color**

USE ICONS **WELL**

9 To keep icons neutral, **use same color as text**. To draw more attention, **use different color**

10 Don’t confuse your users: icons need to make sense and **fit the text or action**!

USE ICONS **WELL**

9. To keep icons neutral, **use same color as text**. To draw more attention, **use different color**
10. Don’t confuse your users: icons need to make sense and **fit the text or action**!
11. Don't make icons larger than what they **were designed for**. If needed, **enclose them in a shape**

Icons were designed for big use: **lots of details**, **thin lines**

SOME **CONCEPTS** FIRST...

👉 After an era of 100% flat design, we're now **back to using shadows** in UI design ("flat design 2.0")

SKEUOMORPHIC DESIGN → **FLAT DESIGN (MINIMAL)** → **FLAT DESIGN 2.0**

Still minimal, but brings back **shadows and depth** for better usability

SOME **CONCEPTS** FIRST...

- After an era of 100% flat design, we're now **back to using shadows** in UI design ("flat design 2.0")
- **Shadow creates depth (3D)**: the more shadow, the **further away from the interface** the element is

- Shadow can be used on **boxes** and **text**

USE SHADOWS **WELL**

1 You **don't have to use** shadows! Only use them if it makes sense for the **website personality**

Less shadows

More shadows

SERIOUS / ELEGANT

PLAYFUL / FUN

USE SHADOWS **WELL**

1. You **don’t have to use** shadows! Only use them if it makes sense for the **website personality**
2. Use shadows **in small doses**: don’t add shadows to every element!

USE SHADOWS **WELL**

1. You **don’t have to use** shadows! Only use them if it makes sense for the **website personality**
2. Use shadows **in small doses**: don’t add shadows to every element!
3. Go light on shadows, don’t make them **too dark**!

USE SHADOWS IN THE **RIGHT SITUATION**

4 Use **small shadows** for smaller elements that should stand out (to draw attention)

USE SHADOWS IN THE **RIGHT SITUATION**

4 Use **small shadows** for smaller elements that should stand out (to draw attention)

5 Use **medium-sized shadows** for larger areas that should stand out a bit more

USE SHADOWS IN THE **RIGHT SITUATION**

4. Use **small shadows** for smaller elements that should stand out (to draw attention)

5. Use **medium-sized shadows** for larger areas that should stand out a bit more

USE SHADOWS IN THE **RIGHT SITUATION**

4. Use **small shadows** for smaller elements that should stand out (to draw attention)
5. Use **medium-sized shadows** for larger areas that should stand out a bit more
6. Use **large shadows** for elements that should really **float above** the interface

USE SHADOWS IN THE **RIGHT SITUATION**

4. Use **small shadows** for smaller elements that should stand out (to draw attention)
5. Use **medium-sized shadows** for larger areas that should stand out a bit more
6. Use **large shadows** for elements that should really **float above** the interface
7. Experiment with **changing shadows** on mouse interaction (click and hover)

NORMAL | **HOVER** | **CLICK**

Medium-sized shadow “pulls” button **closer to the user**

Smaller shadow “pushes” button **back into the interface**

USE SHADOWS IN THE **RIGHT SITUATION**

4. Use **small shadows** for smaller elements that should stand out (to draw attention)
5. Use **medium-sized shadows** for larger areas that should stand out a bit more
6. Use **large shadows** for elements that should really **float above** the interface
7. Experiment with **changing shadows** on mouse interaction (click and hover)
8. Bonus: Experiment with **glows** (colored shadows)

USE BORDER-RADIUS **WELL**

1 Use border-radius to **increase the playfulness** and fun of the design, to make it **less serious**

Less border-radius

More border-radius

SERIOUS / ELEGANT

PLAYFUL / FUN

USE BORDER-RADIUS **WELL**

1. Use border-radius to **increase the playfulness** and fun of the design, to make it **less serious**
2. Typefaces have a certain roundness: make sure that border-radius **matches that roundness!**

😃 **Very round typeface**, **lots** of border-radius in button, icons and image

😃 **Boxy/squared typeface**, but designers wanted to add some playfulness, so **little** border-radius

USE BORDER-RADIUS **WELL**

1. Use border-radius to **increase the playfulness** and fun of the design, to make it **less serious**
2. Typefaces have a certain roundness: make sure that border-radius **matches that roundness!**
3. Use border-radius on **buttons**, **images**, **around icons**, **standout sections** and **other elements**

USE BORDER-RADIUS **WELL**

1. Use border-radius to **increase the playfulness** and fun of the design, to make it **less serious**
2. Typefaces have a certain roundness: make sure that border-radius **matches that roundness!**
3. Use border-radius on **buttons**, **images**, **around icons**, **standout sections** and **other elements**

USE BORDER-RADIUS **WELL**

2. Typefaces have a certain roundness: make sure that border-radius **matches that roundness!**
3. Use border-radius on **buttons**, **images**, **around icons**, **standout sections** and **other elements**

WHY WHITESPACE

- 👉 The right amount of whitespace makes designs look **clean**, **modern** and **polished**
- 👉 Whitespace communicates how different pieces of information are **related to one another**
- 👉 Whitespace implies **invisible relationships between the elements** of a layout

😡

Looks a lot more **polished**, like the design has **space to breathe**

😃

WHERE TO USE WHITESPACE

1. Use tons of whitespace **between sections**

WHERE TO USE WHITESPACE

1 Use tons of whitespace **between sections**

WHERE TO USE WHITESPACE

1. Use tons of whitespace **between sections**

2. Use a lot of whitespace **between groups of elements**

WHERE TO USE WHITESPACE

1. Use tons of whitespace **between sections**

2. Use a lot of whitespace **between groups of elements**

WHERE TO USE WHITESPACE

1. Use tons of whitespace **between sections**

2. Use a lot of whitespace **between groups of elements**

3. Use whitespace **between elements**

WHERE TO USE WHITESPACE

1. Use tons of whitespace **between sections**

2. Use a lot of whitespace **between groups of elements**

3. Use whitespace **between elements**

4. Inside **groups of elements**, try to use whitespace **instead of lines**

HOW MUCH WHITESPACE

5 **The more some elements** (or groups of elements) **belong together, the closer they should be!**

The “Law of Proximity”

No separation between elements, **confusing spacing**

Developer-first

Open-source SDKs with industry-leading accuracy, simple documentation, flexible APIs, and turnkey integrations.

Extensible

Build location-based experiences across the customer journey, from messaging to curbside pickup to address autocomplete.

Title and text **belong together**, therefore there is **less space between them**

Developer-first

Open-source SDKs with industry-leading accuracy, simple documentation, flexible APIs, and turnkey integrations.

Extensible

Build location-based experiences across the customer journey, from messaging to curbside pickup to address autocomplete.

HOW MUCH WHITESPACE

5 **The more some elements** (or groups of elements) **belong together, the closer they should be!**

Ambiguous spacing. What field do labels belong to?!

Each label clearly **belongs** to a certain input field

HOW MUCH WHITESPACE

5 **The more some elements** (or groups of elements) **belong together, the closer they should be!**

😐 Why is the button closer to the lower section?

😃 Button seems to belong to text block, so it's closer

HOW MUCH WHITESPACE

5 **The more some elements** (or groups of elements) **belong together, the closer they should be!**

6 Start with **a lot of whitespace**, maybe even too much! Then **remove whitespace** from there

☝️ Too much whitespace looks **detached**, too little looks too **crammed**

??

😡 Everything is detached

😡 Way too crammed and uninviting

😃 Just right, design can breathe

HOW MUCH WHITESPACE

5 **The more some elements** (or groups of elements) **belong together, the closer they should be!**

6 Start with **a lot of whitespace**, maybe even too much! Then **remove whitespace** from there

☝️ Too much whitespace looks **detached**, too little looks too **crammed**

7 Match **other design choices**. If you have big text or big icons, you need more whitespace

😃 Huge text, lots of whitespace

😃 Small text and images, less space

HOW MUCH WHITESPACE

5 **The more some elements** (or groups of elements) **belong together, the closer they should be!**

6 Start with **a lot of whitespace**, maybe even too much! Then **remove whitespace** from there

☝️ Too much whitespace looks **detached**, too little looks too **crammed**

7 Match **other design choices**. If you have big text or big icons, you need more whitespace

8 Try a hard rule, such as using **multiples of 16px** for all spacing

WHAT IS VISUAL HIERARCHY?

- 👉 Visual hierarchy is about **establishing which elements** of a design **are the most important ones**
- 👉 Visual hierarchy is about **drawing attention** to these most important elements
- 👉 Visual hierarchy is about **defining a "path" for users**, to **guide** them through the page
- 👉 We use a combination of **position**, **size**, **colors**, **spacing**, **borders**, and **shadows** to establish a meaningful visual hierarchy between elements/components

WHAT IS VISUAL HIERARCHY?

- 👉 Visual hierarchy is about **establishing which elements** of a design **are the most important ones**
- 👉 Visual hierarchy is about **drawing attention** to these most important elements
- 👉 Visual hierarchy is about **defining a "path" for users**, to **guide** them through the page
- 👉 We use a combination of **position**, **size**, **colors**, **spacing**, **borders**, and **shadows** to establish a meaningful visual hierarchy between elements/components

WHAT IS VISUAL HIERARCHY?

- 👉 Visual hierarchy is about **establishing which elements** of a design **are the most important ones**
- 👉 Visual hierarchy is about **drawing attention** to these most important elements
- 👉 Visual hierarchy is about **defining a "path" for users**, to **guide** them through the page
- 👉 We use a combination of **position**, **size**, **colors**, **spacing**, **borders**, and **shadows** to establish a meaningful visual hierarchy between elements/components

VISUAL HIERARCHY **FUNDAMENTALS**

1 Position important elements **closer to the top the page**, where they get more attention

Most important title, **close to top of the page**

Most important call-to-action, **close to top of the page**

ATTENTION FLOWS DOWN THE PAGE (AND COMPONENTS)

VISUAL HIERARCHY **FUNDAMENTALS**

1. Position important elements **closer to the top the page**, where they get more attention
2. Use images mindfully, as they draw **a lot of attention** (larger images get more attention)

VISUAL HIERARCHY **FUNDAMENTALS**

1. Position important elements **closer to the top the page**, where they get more attention
2. Use images mindfully, as they draw **a lot of attention** (larger images get more attention)
3. Whitespace creates separation, so **use whitespace strategically** to emphasize elements

VISUAL HIERARCHY FOR **TEXT ELEMENTS**

4 For text elements, use **font size**, **font weight**, **color**, and **whitespace** to convey importance

Confusing! No hierarchy at all

Eco-Villa Garden Pool & Sea View (Villa Epicurea)

5.0 (12) · Superhost · Sesimbra, Setubal, Portugal

Increasing **font size**

Eco-Villa Garden Pool & Sea View (Villa Epicurea)

5.0 (12) · Superhost · Sesimbra, Setubal, Portugal

Increasing **font weights**

Eco-Villa Garden Pool & Sea View (Villa Epicurea)

5.0 (12) · Superhost · Sesimbra, Setubal, Portugal

Lightening color of less important text. Perfect!

Eco-Villa Garden Pool & Sea View (Villa Epicurea)

5.0 (12) · Superhost · Sesimbra, Setubal, Portugal

VISUAL HIERARCHY FOR **TEXT ELEMENTS**

4 For text elements, use **font size**, **font weight**, **color**, and **whitespace** to convey importance

😡 **Confusing!** No hierarchy at all

🙂 Increasing **font sizes** and adding **whitespace**

😃 Adding **font weight** and **color**. Perfect!

VISUAL HIERARCHY FOR **TEXT ELEMENTS**

4 For text elements, use **font size**, **font weight**, **color**, and **whitespace** to convey importance

Eye-catching **background color**

Nice and subtle **background color** to make content stand out

VISUAL HIERARCHY FOR **TEXT ELEMENTS**

4 For text elements, use **font size**, **font weight**, **color**, and **whitespace** to convey importance

5 What text elements to emphasize? **Titles**, **sub-titles**, **links**, **buttons**, **data points**, **icons**

☝️ You can also **de-emphasize** less important text, like **labels** or **secondary/additional information**

VISUAL HIERARCHY FOR **TEXT ELEMENTS**

4. For text elements, use **font size**, **font weight**, **color**, and **whitespace** to convey importance

5. What text elements to emphasize? **Titles**, **sub-titles**, **links**, **buttons**, **data points**, **icons**

☝ You can also **de-emphasize** less important text, like **labels** or **secondary/additional information**

VISUAL HIERARCHY **BETWEEN COMPONENTS**

6 Emphasize an important component using **background color**, **shadow**, or **border** (or multiple)

VISUAL HIERARCHY **BETWEEN COMPONENTS**

6 Emphasize an important component using **background color**, **shadow**, or **border** (or multiple)

VISUAL HIERARCHY **BETWEEN COMPONENTS**

6. Emphasize an important component using **background color**, **shadow**, or **border** (or multiple)

7. Try emphasizing some component A over component B by **de-emphasizing component B**

Component **A** has been made more prominent simply by **de-emphasizing B**

VISUAL HIERARCHY **BETWEEN COMPONENTS**

6 Emphasize an important component using **background color**, **shadow**, or **border** (or multiple)

7 Try emphasizing some component A over component B by **de-emphasizing component B**

VISUAL HIERARCHY **BETWEEN COMPONENTS**

6. Emphasize an important component using **background color**, **shadow**, or **border** (or multiple)

7. Try emphasizing some component A over component B by **de-emphasizing component B**

8. What components to emphasize? **Testimonials**, **call-to-action sections**, **highlight sections**, **preview cards**, **forms**, **pricing tables**, **important rows/columns in tables**, etc.

VISUAL HIERARCHY **BETWEEN COMPONENTS**

6. Emphasize an important component using **background color**, **shadow**, or **border** (or multiple)

7. Try emphasizing some component A over component B by **de-emphasizing component B**

8. What components to emphasize? **Testimonials**, **call-to-action sections**, **highlight sections**, **preview cards**, **forms**, **pricing tables**, **important rows/columns in tables**, etc.

VISUAL HIERARCHY **BETWEEN COMPONENTS**

6. Emphasize an important component using **background color**, **shadow**, or **border** (or multiple)

7. Try emphasizing some component A over component B by **de-emphasizing component B**

8. What components to emphasize? **Testimonials**, **call-to-action sections**, **highlight sections**, **preview cards**, **forms**, **pricing tables**, **important rows/columns in tables**, etc.

WHAT IS **USER EXPERIENCE** (UX)?

> *“Design is not just what it **looks like and feels like.** Design is **how it works***
>
> – Steve Jobs

User Interface (UI) is the visual presentation of a product. It’s how the graphical interface looks and feels like

- 👉 Layout
- 👉 “Personality”
- 👉 Typography, colors, icons, etc.

User Experience (UX) is the overall experience the user has while interacting with the product

- 👉 Does the app feel **logical** and well thought out?
- 👉 Does the navigation work **intuitively**?
- 👉 Are users **reaching their goals**?

UI AND UX **DESIGN**

UI is graphical interface 👉 **UI Design** is what makes an interface **beautiful**

UX is experience with interface 👉 **UX Design** is what makes an interface **useful and functional**

☝️ **UX Design can not exist without UI Design!**

UI →

Both are **interfaces** to get ketchup

UX →

Each creates a different **experience**

UX DESIGN GUIDING PRINCIPLE: **GOALS**

👉 A website or application **exists for a reason**: a **user** has a goal for **visiting** it, and a **business** has a goal for **creating** it

EXAMPLE: Designing websites faster

Good UX design **aligns** the **user's goals** with the **business' goals**

EXAMPLE: Selling design kits for design tools

👉 UX Example:

Highlighting an option in the product pricing table:

- 👉 Helps the **user** decide faster what is the best option ❤️
- 👉 Helps the **business** maximize revenue 💵

UX RULES FOR **USABILITY**

1 Don’t design complicated layouts. Don’t reinvent the wheel. **Use patterns that users know**

UX RULES FOR **USABILITY**

1. Don’t design complicated layouts. Don’t reinvent the wheel. **Use patterns that users know**

2. Make your call-to-action the **most prominent element**, and make the **text descriptive**

UX RULES FOR **USABILITY**

1. Don’t design complicated layouts. Don’t reinvent the wheel. **Use patterns that users know**

2. Make your call-to-action the **most prominent element**, and make the **text descriptive**

3. Use **blue text** and **underlined text** only for **links**!

Looks 100% like a link, but isn’t one!

UX RULES FOR **USABILITY**

1. Don’t design complicated layouts. Don’t reinvent the wheel. **Use patterns that users know**
2. Make your call-to-action the **most prominent element**, and make the **text descriptive**
3. Use **blue text** and **underlined text** only for **links**!
4. Animations should have a **purpose** and be **fast**: between 200 and 500 ms

UX RULES FOR **USABILITY**

1. Don’t design complicated layouts. Don’t reinvent the wheel. **Use patterns that users know**
2. Make your call-to-action the **most prominent element**, and make the **text descriptive**
3. Use **blue text** and **underlined text** only for **links**!
4. Animations should have a **purpose** and be **fast**: between 200 and 500 ms
5. In forms, align labels and fields in a **single vertical line**, to make the form **easier to scan**

UX RULES FOR **USABILITY**

1. Don’t design complicated layouts. Don’t reinvent the wheel. **Use patterns that users know**
2. Make your call-to-action the **most prominent element**, and make the **text descriptive**
3. Use **blue text** and **underlined text** only for **links**!
4. Animations should have a **purpose** and be **fast**: between 200 and 500 ms
5. In forms, align labels and fields in a **single vertical line**, to make the form **easier to scan**
6. Offer users **good feedback** for all actions: form errors, form success, etc. *[web apps]*

UX RULES FOR **USABILITY**

1. Don’t design complicated layouts. Don’t reinvent the wheel. **Use patterns that users know**
2. Make your call-to-action the **most prominent element**, and make the **text descriptive**
3. Use **blue text** and **underlined text** only for **links**!
4. Animations should have a **purpose** and be **fast**: between 200 and 500 ms
5. In forms, align labels and fields in a **single vertical line**, to make the form **easier to scan**
6. Offer users **good feedback** for all actions: form errors, form success, etc. *[web apps]*
7. Place action buttons where they will **create an effect** (law of locality) *[web apps]*

UX RULES FOR **WEBSITE CONTENT**

8 Use a **descriptive**, **keyword-focused headline** on your main page. Don't be vague or fancy!

9. Only include **relevant information**, efficiently! **Cut out fluff** and make the content 100% clear

10. Use **simple words**! Avoid technical jargon and "smart-sounding" words

11. Break up long text with **sub-headings**, **images**, **block quotes**, **bullet points**, etc.

90% of Startups Fail

Here are the most common reasons why startups fail.

I'd like to attract your attention on the top 2 reasons.

> ***"No Market Need"** and **"Ran Out of Cash"**.*

Those are actually closely related! If a startup is building a product nobody wants they will not get sales and thus will run out of cash.

> So to put it bluntly, most of startups fail because they build something nobody wants. Wow!

But still, a lot of startups raise money from investors. Isn't it a sign that they're on the right track? Well, no...

There seems to be an **over-emphasis on money-raising** in the startup industry. But **raising money does not guarantee success**. There are tons of unprofitable startups that raised millions of dollars.

Conclusion

If you have to remember one thing out of this article, it is: **TALK TO USERS!**

- Talk to users **before building**
- Talk to users **while you're building**
- Talk to users **after you've built**

THE WEBSITE-PERSONALITIES-**FRAMEWORK**

100s of well-designed sites **deconstructed**

Distilled into **countless web design rules** that we just learned

RULES SHOULD BE APPLIED ACCORDING TO SELECTED WEBSITE PERSONALITY

Distilled into **7 website personalities**

THE WEBSITE-PERSONALITIES-**FRAMEWORK**

THE 7 PERSONALITIES

1. **Serious/Elegant**
2. **Minimalist/Simple**
3. **Plain/Neutral**
4. **Bold/Confident**
5. **Calm/Peaceful**
6. **Startup/Upbeat**
7. **Playful/Fun**

How do you want website to **appear to users**? What "**vibe**" do you want to transmit?

↓

Choose one of the **website personalities** accordingly

↓

Apply **personality traits** to each **design ingredient**

↓

- **Typography**
- **Colors**
- **Images**
- **Icons**
- **Shadows**
- **Border-radius**
- **Layout**

PERSONALITY 01 – **SERIOUS/ELEGANT**

📋 **OVERVIEW** Design for luxury and elegance, based on **thin serif typefaces**, **golden or pastel colors**, and big high-quality images

🏢 **INDUSTRIES** Real estate, high fashion, jewelry, luxury products or services

Web design **ingredients** we learned about

✍️ **TYPOGRAPHY** Serif typefaces (especially in headings), light font weight, small body font size

🎨 **COLORS** Gold, pastel colors, black, dark blue or grey

🌇 **IMAGES** Big, high-quality images are used to feature elegant and expensive products

⚛️ **ICONS** 🤷 Usually no icons, but thin icons and lines may be used

👻 **SHADOWS** 🚫 Usually no shadows

🟠 **BORDER-RADIUS** 🚫 Usually no border-radius

🧩 **LAYOUT** A creative and experimental layout is quite common

SLOVENSKÝ DOM

KONTAKT

THE ROYAL TENNIS COURT

THE ROYAL TENNIS COURT
On 20 June 1789, the Royal Tennis Court of Versailles played a major part in French history. From being a royal sports hall during the reign of Louis XIV, it became synonymous with the foundation of French democracy and will be forever linked to a key episode in the French Revolution.

LIFE ON THE ESTATE

GAMES AND SPORT AT VERSAILLES
A "green lung" just 16 kilometres from Paris, the estate managed by the Public Institution of the Palace of Versailles draws a great many nature lovers and sports enthusiasts every day. Make the most of this exceptional natural heritage on your own or with friends, as a family or a club.

LIFE ON THE ESTATE

ACQUISITIONS
Discover the latest acquisitions by the Palace of Versailles.

22,000 ARTWORKS TO DISCOVER ONLINE

With 60,000 artworks, collections of Versailles illustrate 5 centuries of French History. This set reflects the dual vocation of the Palace once inhabited by the sovereigns and then a museum dedicated "to all the glories of France" inaugurated by Louis-Philippe in 1837.

PERSONALITY 02 – **MINIMALIST/SIMPLE**

📋 **OVERVIEW** Focusses on the essential text content, using small or medium-sized sans-serif black text, lines, and few images and icons

🏢 **INDUSTRIES** Fashion, portfolios, minimalism companies, software startups

✍️ **TYPOGRAPHY** Boxy/squared sans-serif typefaces, small body font sizes

🎨 **COLORS** Usually black or dark grey, on pure white background. Usually just one color throughout the design

🌇 **IMAGES** Few images, which can be used to add some color to the design. Usually no illustrations, but if, than just black

⚛️ **ICONS** 🤷 Usually no icons, but small simple black icons may be used

👻 **SHADOWS** 🚫 Usually no shadows

🟠 **BORDER-RADIUS** 🚫 Usually no border-radius

🧩 **LAYOUT** Simple layout, a narrow one-column layout is quite common

HI! I AM TOMÁŠ SEBASTIÁN.

Designer with badass skills based in Prague.

LEARN MORE

Enter email →

JUST IN CASE I WILL BE FAMOUS

FOLLOW ME

Somewhere between staring at the screen and tilting my head the magic is done.

I'm Tomáš Sebastián Steinhübel, a digital designer born&raised in Bratislava, Slovakia. Currently, I'm looking for a skillful team to join and learn some new badass skills while creating functional design. Pleased to meet you already.

However through my design journey I've been taught to ignore the nagging self-doubt, shut it down and ship it when needed. Fortunately, instead of grumbling I let the free flow happen.

PERKS OF HIRING ME

More than a designer

Keep it stupid
I like to keep my work simple, minimal with eye-catching details and stunning typography.

Award-winner
Not yet. But with a combination of winning attitude and high ambition I'll be a future game changer.

Keen to learn
You know how to eat an elephant? Bite by bite. That's how I learn. One small thing. Every. Single. Day.

Work hard
What would be the point of

Play hard
I love cold beer, tasty food,

PERSONALITY 03 – **PLAIN/NEUTRAL**

📋 **OVERVIEW** Design that gets out of the way by using **very neutral and small typefaces**, and a boxy, structured, and condensed layout

🏛️ **INDUSTRIES** Well-established corporations, companies that don't want to make an impact through design

✍️ **TYPOGRAPHY** Neutral-looking sans-serif typefaces are used, and text is usually small and doesn't have visual impact

🎨 **COLORS** Safe colors are employed, nothing too bright or to washed-out. Blues and blacks are common

🌅 **IMAGES** Images are frequently used, but usually in a small format

⚛️ **ICONS** 🤷 Usually no icons, but simple icons may be used

👻 **SHADOWS** 🚫 Usually no shadows

🟠 **BORDER-RADIUS** 🚫 Usually no border-radius

🧩 **LAYOUT** Structured and condensed layout, with lots of boxes and rows

Showhomes

Be inspired at one of our showhomes.

See all showhomes

Every Design Builders home is *unique*

We design and build one-off architecural homes throughout the North Island. No existing plans, templates, or catalogues, instead, we work with you to create a unique home designed and built just for you, inspired by you.

The homes we create are all different, but they start the same way: with a blank sheet of paper and a client who wants a great original home.

You might think that a home designed and built the way you want is out of your reach, but with Design Builders, you can afford to think differently. Our process is built around you including your budget.

PERSONALITY 05 – **CALM/PEACEFUL**

📋 **OVERVIEW** For products and services that care about the consumer, which is transmitted by **calming pastel colors** and **soft serif headings**

🏥 **INDUSTRIES** Healthcare, all products with focus on consumer well-being

✍️ **TYPOGRAPHY** Soft serif typefaces frequently used for headings, but sans-serif headings might be used too (e.g for software products)

🎨 **COLORS** Pastel/washed-out colors: light oranges, yellows, browns, greens, blues

🌇 **IMAGES** Images and illustrations are usual, matching calm color palette

⚛️ **ICONS** ✅ Icons are quite frequent

👻 **SHADOWS** 🤷‍♀️ Usually no shadows, but might be used sparingly

🟠 **BORDER-RADIUS** ✅ Some border-radius is usual

🧩 **LAYOUT** 🤷‍♀️ All kinds of layouts, no particular tendencies

MINDFUL @ Work CERTIFICATION

Space for you to breathe.

A global community of expert teachers and dedicated practitioners who are all about spreading goodness.

Since its inception, MINDFUL has been at the forefront of the modern mindfulness movement, providing meditation experiences and relevant mindfulness content for the modern human.

MINDFUL @ WORK CERTIFICATION

THE WALL STREET JOURNAL. VOGUE The New York Times WELL+GOOD BuzzFeed

BENEFITS OF MEDITATION

We enable you to feel good.

Reduce stress

Become BFF with your mind and learn how to effectively cope with the tough stuff – like anxious thoughts and difficult emotions. Hi, present moment awareness. Bye, Obsessiveness.

Increase productivity

Let's face it, there is so much work to be done in the world and it can be overwhelming. Create mental and emotional space so you can show up more fully for both your internal and external world.

Reduce depression

Studies show that meditation, especially when paired with exercise, can lead to a 40% decrease in depression. Turns out that the mind body connection is real – as is science.

PERSONALITY 06 – **STARTUP/UPBEAT**

📋 **OVERVIEW** Widely used in startups, featuring **medium-sized** sans-serif typefaces, **light-grey backgrounds**, and rounded elements

🏛️ **INDUSTRIES** Software startups, and other modern-looking companies

✍️ **TYPOGRAPHY** Medium-sized headings (not too large), usually one sans-serif typeface in whole design. Tendency for lighter text colors

🎨 **COLORS** Blues, greens and purples are widely used. Lots of light backgrounds (mainly gray), gradients are also common

🌇 **IMAGES** Images or illustrations are always used. 3D illustrations are modern. Sometimes patterns and shapes add visual details

⚛️ **ICONS** ✅ Icons are very frequent

👻 **SHADOWS** ✅ Subtle shadows are frequent. Glows are becoming modern

🟠 **BORDER-RADIUS** ✅ Border-radius is very common

🧩 **LAYOUT** Rows of cards and Z-patterns are usual, as well as animations

Combinator HEINEKEN ELSEVIER

Great interfaces set your business up for growth

The numbers are in. Digital products with great user experience far outperform those without. That is why successful tech startups are investing in top-notch user interfaces. Here's why you should too.

Boost productivity

Make your product more valuable to your users by boosting their productivity through optimised UX.

Increase confidence

Seamless UI and slick UX increases customer confidence in your application's ability as a whole.

Scale your product

Rapidly scale up your product without sacrificing quality by implementing a design system.

We design great user interfaces that empower people and drive value

We know what makes interfaces great: seamless journeys. Our team merges expertise in CX, UX, and UI design to craft seamless processes and products. Even when users interact with your product across devices, applications, and (real-world) touchpoints. That's how we empower people and drive value.

Making complex applications seemingly simple is what we do best

Robin Humphreys

Native mobile apps

Beautiful native iOS & Android apps that deliver a polished user experience.

SaaS applications

Feature-driven applications in the cloud that are optimised for self-service.

Enterprise software

Complex and robust software solutions that feel bespoke and intuitive.

We built Circle for creators like you
Communities are the shell life of independent online creators. They build connections among members, enable profound experiences, and empower vocal advocates.
But after speaking to hundreds of creators, we observed them struggle with co-opted products, stitch together subpar solutions, and wrestle with discussion boards that went stale.
So, we built Circle: a community platform that integrates with your creator stack and transforms your passive audience into passionate superfans for life.
Start your community today

FAQ

We know that you have a lot of questions,
we've tried to list the most important ones 😇

- Do I need to pay only once to get Popkit for life?

  Absolutely! We offer only one price: 79$ for a lifetime unlimited access (unlimited websites, unlimited domains, unlimited page views, unlimited widgets...)

- Do i need how to code?
- Does Popkit will work with my website?
- Does Popkit affect Website Performance?
- Do you have plans for larger needs?
- Can I use the Popkit widgets adapted to my language?

WHAT WE DO (SO YOU DON'T HAVE TO)

01 Project net worth over time

02 Incorporate the essential data

By using relevant third-party data, Path more accurately calculates the cost of each scenario you explore and its impact on your overall finances.

- US Census earnings growth data
- Bureau of Labor Statistics retirement spending data
- Real-time property prices from Redfin
- Freddie Mac mortgage data
- Department of Education's projected college costs

03 Reflect your all-in costs

WHAT'S COVERED?

- **Your personal belongings in your home**
  When they are damaged, destroyed or stolen
- **Your liability to other people**
  Occupier's and personal liability
- **Visitors' possessions**
  Damage occurring at your home, provided they are not insured elsewhere
- **Money cover**
  Covers against loss or damage occurring at any location within the United Kingdom

11 CUSTOMER TESTIMONIALS

B **COMPONENTS**

"hey.com is the most exciting app I've used in years. A complete rethinking of email, full of bold, brilliant ideas. Highly recommended. Not only for the product itself, but because its boldness will inspire you to question your assumptions and think differently."

Adrian Holovaty

"I just got an early demo of Hey from @jasonfried. I can confirm this will be my new default email over Gmail... it's a beautiful rethinking of everything wrong with email. I can't wait for you all to play with it soon."

Kevin Rose

"Let me tell ya'll something: Hey is going to change the way we use email. Bye-bye Gmail. Hellllooooo Hey."

Kris, MBA

"I can do everything on my own schedule. From picking out interview time slots to selecting only the companies I want to interview with, this is what recruiting should look like.

Joseph G.
Software Engineer

"I've never felt so taken care of by a recruiter in my life. Saying my Talent Advocate goes above and beyond is an understatement. She clearly loves what she does, and that devotion is absolutely contagious.

Jorge S.
UX Designer

"Finding a new job is tedious and stressful. Working with Hired meant multiple companies that were a good fit were looking to hire me.

Dipika M.
Software Engineer

"Leo is much more sophisticated than a simple news filtering tool. It's a true AI that uses machine learning and NLP to filter out the noise.

Jon Henshaw (Lead SEO Analyst – CBS Interactive)

Braintree
A PayPal service

"We call it our cheat code. To find qualified talent that's looking ... half the battle is already won.

Kyle Barbato
Sr. Manager, Talent Acquisition, Braintree

11 CUSTOMER TESTIMONIALS

John Crain
@gnarzly

Have been trying out @Tandem_HQ for video and screen share. Love not having to keep track of zoom links :D

Avery Carter
Product @ Placenote

Our team has been using it for about 2 months or so, and it has been a really nice way to start conversations.

Working remote, you find that there is this weird social awkwardness over starting calls or wanting a super quick call with another teammate. Tandem has the best solution for that problem from what I've seen thus far.

The team works hard and cares a lot about customer feedback which is awesome. Keep it up!

javascript joe
@jsjoeio

Huge fan of Tandem so far! I think this is going to take distributed teams to the next level.

What I love about it:
- intuitive + beautifully designed UI
- simple + easy to use
- instantly connect to team members via video or audio chat
- instantly share your screen

I honestly feel like this is going to be a game-changer for working remotely. Excited to see the future of Tandem!

Nikema Prophet
@dev_nikema

Tried out @Tandem_HQ today with @enigmaticsoulrg and loved it. Much better than a running zoom call for virtual coworking.

JASON
@jscotpearson

Excited for the @Tandem_HQ crew! They came by @figmadesign a while back to show us what they were cooking up. Rad that it was inspired by, and designed using, Figma. As the manager of a semi-remote team, anything to make remote work more enjoyable and productive is 🔥💥👇!

Kevin Hale
@likevests

Just tried Tandem and it's probably one of the best video/screenshare collaboration apps for remote teams I've seen since Screenhero. So many beautiful little details. tandem.chat

From our clients

Davide Dattoli
Co-founder & CEO, Talent Garden

«Pros with fresh ideas. This studio is able to make digital products around people needs.»

Kristo Bagrikop
Mobility Platforms Product Owner, European Innovation Lab

«What makes this team great is how they're helping us in decision-making. We stopped talking about things over and over and just focused on building the right product.»

Vittorio Banfi
Co-founder & CEO, Retoverty

«Moze is a world-class team working at the intersection of technology, design and business. If you are expert in those areas, and obsessed with design, you can create beautiful things that just work. That's what they do.»

I installed Fathom on my personal website yesterday, and wow, what a breath of fresh air. I love how simple it is, and for something like a blog it really gives you all the traffic metrics you could need.

Joel Gascoigne, CEO of Buffer

I switched to Fathom because it's an ethical analytics tool that I can trust with my data. The interface is beautifully simple to use: it shows me everything I want to know about my site's performance, and nothing I don't!

Charli Marie, creative director of ConvertKit

Fathom is the perfect privacy-based Analytics solution for us. We can provide the metrics that our clients need and reassure them that their customers' data isn't being shared with faceless companies.

Darren Pinder, owner of Vatu

Developers are pretty tech-savvy people, and these days very privacy-cautious–they understand how scripts follow you across the internet, that's why we choose Fathom, because they don't do that.

Oskar Krawczyk, cofounder of JSFiddle

★★★★★

"It's true, the original Casper is a great value for the price. The cooling technology keeps me comfortable all night."

11 CUSTOMER TESTIMONIALS

B **COMPONENTS**

Our members are so impressed. It's intuitive. It's clean. It's distraction free. I'm so glad we made this decision.

Pat Flynn
Founder @ Smart Passive Income

Circle is going to fill the GIANT hole in between FB groups and Slack for virtually every kind of online community.

Ankur Nagpal
Founder @ Teachable

If you already have an audience, use a platform like Circle.

David Spinks
Founder @ CMX

Circle came at an absolutely crucial time for the Makerpad community and has been essential in allowing us to grow. The team are so responsive and the way they build is so intuitive that the platform gets better every week. I recommend Circle to everyone looking at building a community.

Ben Tossell
Founder @ Makerpad

After playing with Circle for an afternoon I am seriously impressed. This is the app communities have been waiting for. Coming to every podcast and channel creator in 3 2 1...

Tyler Lastovich
Creative + technical strategist

We've built three communities serving more than 1,500 students using the new Circle.

- Zoom hosts live calls
- Teachable delivers curriculum
- Circle combines ephemeral chat with permanent discussions

These three ingredients + engaged instructor + vibrant community = transformative learning experience.

Will Mannon
Course Manager @ Forte Labs

Entire community + forums load via pop-up on foundersummit.co - so fancy, nice work Circle!

Tyler Tringas
Earnest Capital

Shereen
★★★★★

"Lugg is THE best! Solomon and Yuri were great! For my most recent purchase I coordinated a pickup elsewhere and drop off at my place. They were fast, efficient, friendly, and extremely helpful (I needed to move a piece of furniture to make some room for the item they picked up). They were in and out in 10 minutes! Thanks a ton!"

Read more customer reviews →

"Overall, Statamic feels like a CMS of the future, whereas WordPress feels like a CMS of 10 years ago. I'm sold & can't wait to use it for my other sites."

Paul Jarvis
Founder, Fathom Analytics

"While Lessonly's software is exceptional, their people have taken this from a business exchange to a partnership."

Marge from Dia & Co.

Figma

"Because communication is centralized, it saves us a ton of overhead."

— Badrul Farooqi // Product Manager

SWITCHING FLEX-DIRECTION TO **COLUMN**

```
.accordion {
  display: flex;
  gap: 24px;
  flex-direction: column;
}
```

WITH FLEX-DIRECTION SET TO COLUMN:

- 👉 `align-items` aligns items **horizontally**, no longer vertically
- 👉 `justify-content` aligns items **vertically**, no longer horizontally
- 👉 `gap` acts like **`margin-bottom`**, no longer like `margin-right`

Our Story

We're on a mission to make plant-centric, wholesome food accessible to everyone. Our meals are hand-made with care, packed with natural, mindfully-sourced ingredients, and delivered sustainably.

LEARN MORE ABOUT OUR STORY & FOOD ETHOS >

We're with you

Once you have your tailored plan, we'll help you stick with it. Track your supplements, learn about how they work, and get new recommendations as your health changes, all in our handy app.

Say hello to your new healthy habit.

Take the quiz

Dina gets business through her online shop

"I love using Typeform because I don't have to go back and forth via email to give people an estimate. It's a simple introduction to my process that helps my business run smoothly."

Read more →

Strive to be *sustainable*

We choose vendors who champion sustainable practices. You'll find vendors who use local, seasonal ingredients, reduce waste, and demonstrate environmental responsibility

Amplify other channels

Using Hustle doesn't mean overhauling your entire communications strategy. Instead, it makes people more receptive to other channels. Text to schedule a call and they're more likely to pick up. Alert them to an incoming email and they're more likely to open it.

Unlimited products

Add and manage products with an easy-to-use interface that scales with you and gives you complete control over how products are arranged.

Rich product listings

Give shoppers the best browsing experience with rich product descriptions, embedded videos, images, related products, and more.

Product catalogs

Show products organized by category and help customers find exactly what they're looking for with intuitive menus.

Simple.

Enjoy your trip and thank guests

Once funded, it's time to start your adventure together. Share your gratitude and experience by sending a personalized thank you message to contributors. Include a photo from your trip to add a personal touch.

Start your adventure

01. Make a logo in minutes

Forget looking generic! Looka's software is powered by AI to create a logo that matches your vision — no design skills required. Generate endless options, and tweak designs to get exactly what you want.

Get started

We design great user interfaces that empower people and drive value

We know what makes interfaces great: seamless journeys. Our team merges expertise in CX, UX, and UI design to craft seamless processes and products. Even when users interact with your product across devices, applications, and (real-world) touchpoints. That's how we empower people and drive value.

Making complex applications seemingly simple is what we do best

Robin Humphreys
Co-founder

Quick Access

Our overlay makes sharing a breeze. Instantly save, copy or drag & drop screenshots or screen recordings to other apps. Whatever your workflow looks like, it's going to fit.

Watch the video

The essential swiss army knife for screenshots, markups, and GIFs. Every Mac owner needs this.
Tyler Tringas, Founder at Earnest Capital

Stay organized. Show up prepared

Agenda templates and timely reminders help you build better meeting habits without much effort.

> *For the meeting itself — **the actual oomph is in the notes**. It's an alignment moment even before the meeting starts.*

Tasha Gideon
Verrah

Project summary
Furniture and lighting for 83 flats, plus indoor and outdoor amenity spaces
Personal design consultation to create final product specification
An easy approval process for product suggestions on the Clippings platform
Consolidation of furniture and lighting accessories from over 50 suppliers in the Clippings warehouse
Furniture installation on-site in line with all Covid-19 safety guidelines in May and June 2020
Build-to-rent developer Quintain Living approaches each new development with the mentality of a start-up, eager to try new ways of working, one of the team's core values is to keep on learning.
So when it came to finding a design concept for Belon, Quintain Living's latest BTR apartment building, the team was open to a new approach. "We wanted to try a different methodology," explains Head of Mobilisation Jennie Fojtik, who is responsible for filling an empty building with modern flats and engaging amenity spaces for successful young professionals.

TABLE OF CONTENTS
It's no wonder polling shows that nearly half of U.S. workers want to keep working from home even after restrictions lift: There's so much more flexibility. Without a commute, hours are less set. Without an office, everyone is less subject to the group norms that have right-owls trying to look alert at 8 a.m., and that makes people self-conscious about leaving the building for any reason.
Still, many people feel reticent about using this freedom. Anecdotes abound of people sitting hunched at their computers without ceasing, not so much as leaving the house for days at a time. In one survey of people working from home, two-thirds said they were more likely to work nights and weekends than they were prior to working remotely.
The 3 Breaks You Need to Take Every Day
An easy strategy for being happier and more productive at work
But fair is fair. It's likely your workplace is benefiting from you working remotely. Why shouldn't you get something out of it, too? Here's how you can start using during-the-day flexibility to improve your life satisfaction:
Track your time
Work hours don't perfectly correlate with productivity, but if you know that

THE **PROCESS** BEHIND BUILDING A WEBSITE

1. **DEFINE**
2. PLAN
3. SKETCH
4. DESIGN AND BUILD
5. TEST AND OPTIMIZE
6. LAUNCH
7. MAINTAIN AND UPDATE

1 DEFINE THE PROJECT

👉 Define **WHO the website is for**. Is it for yourself? For a client of your agency or your freelancing business?

👉 Define **WHAT the website is for**. In other words, define **business and user goals** of your website project (👋 *See lecture on UX*)

> **Business goal example:** *Selling premium dog food*
> **User goal example:** *Finding high-quality dog food for good price*

👉 Define a **target audience**. Be really specific if possible and if it makes sense for your website (this can come from your client)

> **Example:** *"Women, 20 to 40 years old, living in Europe, earning over 2000€/month, with a passion for dogs"*

THE **PROCESS** BEHIND BUILDING A WEBSITE

1. **DEFINE**
2. **PLAN**
3. SKETCH
4. DESIGN AND BUILD
5. TEST AND OPTIMIZE
6. LAUNCH
7. MAINTAIN AND UPDATE

2 PLAN THE PROJECT

- 👉 Plan and gather **website content**: copy (text), images, videos etc.
- 👉 Content is usually **provided by the client**, but you also can help them produce and find some content (simply finding free images is easiest, but if they want copy, charge them extra)
- 👉 For bigger sites, plan out the **sitemap**: what pages the site needs, and how they are related to one another (content hierarchy)
- 👉 Based on the content, plan what **sections** each page needs in order to convey the content's message, and in which order
- 👉 Define the **website personality** (👋 *See web design section*)

THE **PROCESS** BEHIND BUILDING A WEBSITE

1. **DEFINE**
2. **PLAN**
3. **SKETCH**
4. DESIGN AND BUILD
5. TEST AND OPTIMIZE
6. LAUNCH
7. MAINTAIN AND UPDATE

3 SKETCH LAYOUT AND COMPONENT IDEAS

- 👉 Think about what **components** you need, and how you can use them in **layout patterns** (👋 *Get inspiration in web design section*)
- 👉 **Get ideas out of your head**: sketch them with **pen and paper** or with some design software (e.g. Figma)
- 👉 This is an **iterative process**: experiment with different components and layouts, until you arrive at a first good solution
- 👉 You don't need to sketch everything, and **don't make it perfect**. At some point, you're ready to jump into HTML and CSS

THE **PROCESS** BEHIND BUILDING A WEBSITE

1. **DEFINE**
2. **PLAN**
3. **SKETCH**
4. **DESIGN AND BUILD**
5. TEST AND OPTIMIZE
6. LAUNCH
7. MAINTAIN AND UPDATE

4 DESIGN AND BUILD WEBSITE

- 👉 Use decisions, content and sketches from Steps 1, 2 and 3 to **design and build the website with HTML and CSS** (“designing in the browser”)
- 👉 You already have the **layout** and **components** that you selected in Step 3. In this step, you need to design the actual **visual styles**
- 👉 Create the design based on selected **website personality**, the **design guidelines** I showed you, and **inspiration** (👋 *See web design section*)
- 👉 Use the **client’s branding** (it if exists already) for design decisions whenever possible: **colors**, **typography**, **icons**, etc.

THE **PROCESS** BEHIND BUILDING A WEBSITE

1. **DEFINE**
2. **PLAN**
3. **SKETCH**
4. **DESIGN AND BUILD**
5. **TEST AND OPTIMIZE**
6. LAUNCH
7. MAINTAIN AND UPDATE

5 TEST AND OPTIMIZE

- 👉 Make sure website works well in **all major browsers** (Chrome, Firefox, Safari, Edge, maybe even old IE 😱)
- 👉 Test the website on **actual mobile devices**, not just in DevTools
- 👉 Optimize all **images**, in terms of dimensions and file size (👋 *See lecture on images*)
- 👉 Fix simple **accessibility** problems (e.g. color contrast issues)
- 👉 Run the **Lighthouse** performance test in Chrome DevTools and try to fix reported issues
- 👉 Think about **Search Engine Optimization** (SEO)

THE **PROCESS** BEHIND BUILDING A WEBSITE

1 **DEFINE**

2 **PLAN**

3 **SKETCH**

4 **DESIGN AND BUILD**

5 **TEST AND OPTIMIZE**

6 **LAUNCH**

7 MAINTAIN AND UPDATE

6 LAUNCH THE MASTERPIECE 🚀

- 👉 Once all work is done, everything is perfect, and you got approval from your client (or yourself 😄), it's time to **share your masterpiece with the world!**
- 👉 Upload your website files to a **hosting platform**. There are countless platform, we will use one with a free plan (Netlify)
- 👉 Choose and buy a great **domain name**, one that represents the brand well, is memorable and easy to write

THE **PROCESS** BEHIND BUILDING A WEBSITE

1. DEFINE
2. PLAN
3. SKETCH
4. DESIGN AND BUILD
5. TEST AND OPTIMIZE
6. LAUNCH
7. MAINTAIN AND UPDATE

7 MAINTAIN AND KEEP UPDATING WEBSITE

- 👉 Launching is not the end…
- 👉 Keep the website content **updated over time**. If you're working with a client, you can create a monthly maintenance contract (recurring revenue 🤑)
- 👉 Install **analytics software** (e.g. Google Analytics or Fathom) to get statistics about website users. This may **inform future changes** in the site structure and content.
- 👉 A **blog** that is updated regularly is a good way to keep users coming back, and is also good for SEO.

OMNIFOOD PROJECT – SETUP AND DESKTOP VERSION

LECTURE

DEFINING AND PLANNING THE PROJECT (STEPS 1 AND 2)

YOUR FIRST **REAL-WORLD** PROJECT

OMNIFOOD

- 👉 **Your first "job"!**
- 👉 **You were hired to design and build a website** for a fictional company called Omnifood
- 👉 Omnifood is startup that uses AI to create and deliver custom healthy meal plans
- 👉 They provided us with all the content for the website (`content.md`)

STEP 1: **DEFINE THE PROJECT**

👉 Define WHO the website is for

For a client

👉 Define WHAT the website is for

Business goal: Selling monthly food subscription
User goal: Eating well effortlessly, without spending a lot of time and money

👉 Define target audience

Busy people who like technology, are interested in a healthy diet, and have a well-paying job

✅ From provided content file:

"We are a technology company first, but with a major focus on consumer well-being through a healthy diet. Most people are very busy with their jobs, family and friends, and other important activities, which doesn't leave much time for cooking. This might lead to a poor diet and lasting health consequences. We want to solve this problem by using an AI-centric approach. Users can use our app to select their diet and foods they like and dislike, and our AI algorithm will create a custom and individual weekly meal plan. But we don't stop there. We partner with restaurants and other cooking partners to actually cook and deliver all meals from the generated meal plans, in selected cities. All this will be packed up in a monthly subscription, where users can choose between receiving one or two meals per day, every single day of the month."

STEP 2: **PLAN THE PROJECT**

✅ **Plan and gather website content**

🚫 **Plan out the sitemap**

We will just build a **one-page marketing website** (oftentimes called a landing page), so no sitemap

👉 **Define website personality**

Based on the tech-centered target audience, as well as the actual product being sold, we will use the **startup/ upbeat** personality. We might add some elements of the **calm/peaceful** personality, since the product is all about consumer well-being as well

👉 **Plan page sections** 👇

✅ **From provided content file:**

"We are a technology company first, but with a major focus on consumer well-being through a healthy diet. Most people are very busy with their jobs, family and friends, and other important activities, which doesn't leave much time for cooking. This might lead to a poor diet and lasting health consequences. We want to solve this problem by using an AI-centric approach. Users can use our app to select their diet and foods they like and dislike, and our AI algorithm will create a custom and individual weekly meal plan. But we don't stop there. We partner with restaurants and other cooking partners to actually cook and deliver all meals from the generated meal plans, in selected cities. All this will be packed up in a monthly subscription, where users can choose between receiving one or two meals per day, every single day of the month."

WHAT IS **RESPONSIVE DESIGN**?

RESPONSIVE DESIGN

- Design technique to make a webpage adjust its layout and visual style to **any possible screen size** (window or viewport size)
- In practice, this means that responsive design makes websites usable on all devices, such as **desktop computers, tablets, and mobile phones**.
- It's a set of practices, **not a separate technology**. It's all just CSS!

RESPONSIVE DESIGN **INGREDIENTS**

1 FLUID LAYOUTS

- To allow webpage to adapt to the **current viewport** width (or even height)
- Use `%` (or `vh` / `vw`) unit instead of `px` for elements that **should adapt to viewport (usually layout)**
- Use `max-width` instead of `width`

2 RESPONSIVE UNITS

- Use `rem` unit instead of `px` for most lengths
- To make it easy to **scale the entire layout down** (or up) automatically
- **Helpful trick:** setting `1rem` to `10px` for easy calculations

3 FLEXIBLE IMAGES

- By default, images **don't scale automatically** as we change the viewport, so we need to fix that
- Always use `%` for image dimensions, together with the `max-width` property

4 MEDIA QUERIES

- Bring responsive sites to life!
- To change CSS styles on **certain viewport widths** (called breakpoints)

We will learn how to use media queries and how to select breakpoints in the **next section**

DESKTOP-FIRST **VS.** MOBILE-FIRST DEVELOPMENT

DESKTOP-FIRST

- 👉 Start writing CSS for the desktop: **large screen**
- 👉 Then, media queries **shrink design** to smaller screens.

MOBILE-FIRST

- 👉 Start writing CSS for mobile devices: **small screen**
- 👉 Then, media queries **expand design** to a large screen
- 👉 Forces us to reduce websites and apps to the **absolute essentials**.

We will do **desktop-first** in this project. It's easier to learn!

BUILDING THE **TESTIMONIALS + GALLERY** SECTION

I installed Fathom on my personal website yesterday, and wow, what a breath of fresh air. I love how simple it is, and for something like a blog it really gives you all the traffic metrics you could need.

Joel Gascoigne, CEO of Buffer

I switched to Fathom because it's an ethical analytics tool that I can trust with my data. The interface is beautifully simple to use: it shows me everything I want to know about my site's performance, and nothing I don't!

Charli Marie, creative director of ConvertKit

Fathom is the perfect privacy-based Analytics solution for us. We can provide the metrics that our clients need and reassure them that their customers' data isn't being shared with faceless companies.

Darren Pinder, owner of Vatu

Developers are pretty tech-savvy people, and these days very privacy-cautious–they understand how scripts follow you across the internet, that's why we choose Fathom, because they don't do that.

Oskar Krawczyk, cofounder of JSFiddle
